1. Introduction

Purpose of this Manual

This manual explains how to use the BRERP system across all modules. It provides step-by-step workflows and guidance for end-users and power users.

Audience and Prerequisites

- End users performing day-to-day operations in modules
- Supervisors/approvers responsible for reviewing and approving tasks
- Administrators managing users, roles, and system setup

You should have an active user account and the correct roles assigned by your administrator.

System Overview

BRERP is a modular ERP composed of functional domains (modules). Each module contains related features surfaced via the left-side navigation. Permissions control access to specific pages and actions.

Roles and Permissions

BRERP uses role-based access control. Your role determines what you can see and do. If you cannot access a page or action described here, contact an administrator to review your role assignments under Settings > Roles/Users.

Navigation Basics

- Use the left navigation to open a module.
- Within each module, use sub-menus to access lists, dashboards, and setup pages.
- Most lists support search, filter, sort, pagination, and export.

Conventions Used in this Manual

- “Go to ...” indicates the navigation path (Module > Menu > Page).
 - Buttons and actions are written as: Save, Submit, Approve, Delete.
 - Some features require supporting master data to be set up first.
-

2. Getting Started

Accessing the System (Login)

- Open the BRERP URL provided by your IT team.
- Enter your email/username and password.
- Click Login. If multi-factor or email verification is required, follow the prompts.

Password Reset and Verification

- Use “Forgot Password” on the login page to receive a reset link.
- For third-party (supplier) users, email verification can occur via links sent by the system.

User Profile and My Account

Go to My Account:

- Schedule: view your upcoming activities and meetings.
- Tickets: review tickets assigned to you. Update your profile details as permitted by your role/organization policy.

Language, Timezone, Number/Currency Formats

These follow system defaults unless overridden by your organization. Contact admins if adjustments are needed.

3. Cross-Cutting Concepts

Search and Filters

- Most lists have a search box and column filters.
- Use filters to narrow results (e.g., status, date ranges).

Lists, Create/Edit Forms, Detail Views

- Index/List: overview of records, with actions (View, Edit, Delete).
- Create/Edit: forms to input or update information.
- Detail/Show: read-only view with tabs for related items, activity, or attachments.

Attachments and Document Uploads

- Many pages allow uploading documents (PDF, images, spreadsheets).
- Use the “Upload” button; add a description/tags where applicable.

Approval Workflows (Submit, Approve, Reject)

- Some processes require approval (procurement plans, invoices, petty cash, policies, etc.).
- Typical flow: Draft → Submit → Approve/Reject → Posted/Active.
- Approvers see an inbox or specific “Approval” pages.

Notifications and Messaging

- Bulk notifications (teams/users), email/sms logs exist in CRM and Settings.
- Some modules trigger system alerts (e.g., fleet service alerts).

Reports and Exports

- Each module has a Reports menu. Select a report and export format (PDF/Excel) when available.
-

4. Modules

Below are step-by-step user guides for each module and its child features.

4.1 Third Party (External Parties & Supplier Portal)

Overview

Manage external parties (suppliers) and third-party users. External users can authenticate, maintain profiles, and participate in procurement workflows.

Navigation

- Web: Third Party > Parties (list, create, edit, delete)
- API (for supplier portal processes): handled by your integration/frontend portal (login/register, bank details, categories)

Typical Tasks

1. View and manage third parties (internal users)
- Go to Third Party > Parties

- Search by name or category
 - Create: click Create, fill in details, Save
 - Edit: open a party, click Edit, update details, Save
 - Bulk actions: select multiple and use Bulk Action
2. Supplier (third-party) user onboarding (external portal)
- Register (email verification via link)
 - Login
 - Complete company details
 - Add bank details
 - Access procurement invitations and submit responses where applicable

Tips & Dependencies

- Ensure categories and required codes are set up under Settings.
 - External users require approval and active status.
-

4.2 CRM (Customer Relationship Management)

Overview

Covers calls, contacts, tickets, clients, leads, accounts, marketing (campaigns, lists, planner, socials), feedback (surveys, reviews), email conversations, product development, debt collection, and reports.

Navigation

CRM > [feature], e.g.:

- Calls: Start Call; schedule/reschedule
- Contacts: manage contacts; attach to leads/clients
- Tickets: create, comment, watchers, resolve
- Clients: summary, activities, relations, discussions, notes, email, sms, tasks
- Leads: onboarding, status, activities, meetings, emails/sms, tasks
- Email: conversations, drafts, attachments
- Marketing: competitors, campaigns, lists, planner, socials
- Feedback: surveys and reviews
- Product Development: items, features, comments, workflows
- Debt Collection: loan lists, activities, scheduling, notifications
- Reports

Typical Workflows

1. Manage Leads → Clients
 - Go to CRM > Leads
 - Create new lead (basic info)
 - Add activities (calls/meetings), notes, emails/sms
 - Update status (qualified/disqualified)
 - Use Onboarding to convert to Client
2. Manage Tickets
 - Go to CRM > Tickets
 - Create ticket, assign priority and assignees
 - Add comments and documents
 - Resolve ticket; restore if needed

3. Run a Marketing Campaign

- Create lists (CRM > Marketing > Marketing Lists)
- Create campaign (CRM > Marketing > Campaigns)
- Add contacts, submit for approval if applicable, track progress

4. Email Conversations

- CRM > Email Conversations
- Read, reply drafts, attach files, send

5. Debt Collection Activities

- CRM > Debt Collection
- View loan list, schedule calls/meetings, contact guarantors, send sms/email

Tips

- Use “select2/fetch” endpoints pages to search clients/leads quickly.
- Boards and committees pages support governance and planning meetings.

4.3 Procurement

Overview

Covers department needs entry and consolidation; plan setup, scheduling, submission, and approvals; suppliers and prequalification; tendering; RFQs and evaluation; awards; purchase orders; goods receipts; contracts lifecycle; reports.

Navigation (examples)

- Procurement > Department Needs (raise needs; approvals)
- Procurement > Plan: Plan Maintain, Set Method, Schedule, Submit for Approval, Approval Inbox
- Procurement > RFQ: create, responses, evaluation, criteria setup
- Procurement > Tendering: initiation, opening, decrypt, committee, evaluations, roles, member response
- Procurement > Suppliers and Prequalification
- Procurement > Purchase Orders
- Procurement > Goods Receipts
- Procurement > Contracts (create, approve, link LPO, amend, terminate, execute)
- Procurement > Reports

Typical Workflows

1. Department Needs → Consolidated Plan
 - Department raises needs (items, quantities, categories)
 - Approver reviews Department Needs (approve/reject)
 - Consolidation dashboard aggregates needs into a plan
2. Plan Setup & Method
 - Plan Maintain: add/edit plan items
 - Set Method: assign procurement methods to items
 - Schedule: define timelines
 - Submit for Approval: send plan for approvals
 - Approval Inbox: approvers act on submitted plans
3. RFQ Management
 - Create RFQ and Lines (link to requisitions if needed)

- Gather supplier responses (RFQ Responses)
- Evaluate responses, consolidate scores, and award

4. Tendering

- Initiate tender, setup criteria and sections
- Open bids, decrypt (as applicable)
- Form committee and record member responses
- Evaluate and consolidate bids
- Approve awards

5. Post-Award

- Create Purchase Orders (POs)
- Record Goods Receipts (GRNs)
- Manage contracts lifecycle (approval, amendments, execution monitoring)

Tips

- Prequalification rounds and supplier applications streamline supplier pools.
- Use Procurement Reports for oversight and compliance evidence.

4.4 Inventory

Overview

Manage item masters, SKUs, stores; inter-branch requisitions; transactions (receipts, transfers, adjustments, approvals); stock take; stock consumption; UOM/UOM conversion; price management; reports.

Navigation

- Inventory > Item Master List, SKU
- Inventory > Item Category/Subcategory, Stores
- Inventory > Inter-Branch Requisition (+ Approval)
- Inventory > Transactions: Receipts, Transfers, Adjustments, Approvals
- Inventory > Stock Take, Stock Consumption
- Inventory > Unit of Measure, UOM Conversion
- Inventory > Price Management
- Inventory > Reports

Typical Workflows

1. Master Data Setup

- Define Item Categories/Subcategories
- Create Item Master List entries
- Create SKUs, assign to Stores

2. Inter-Branch Requisition

- Create requisition (source/destination, items)
- Submit; approval manager reviews and approves

3. Stock Transactions

- Receipts: record inbound stock
- Transfers: move stock between stores/branches
- Adjustments: correct stock levels (with reason)
- Approvals: review/approve transactions if required

4. Stock Take & Consumption

- Stock Take: create cycle/count, enter counts, finalize
- Consumption: issue and record consumption for departments or projects

5. Price Management

- Upload or edit item prices; export sample template; re-import updates

Tips

- Always align UOM and conversions before transactions
 - Use store/location filters to find stock quickly
-

4.5 Property Management

Overview

Manage property registry and structure (blocks, floors, units), tenants and leases, billing/invoicing, receipts, ledger and dashboard, maintenance requests and work completion, settings, and reports.

Navigation

- Property > Registry (Properties, Types, Categories, Attachments)
- Property > Structural Mapping (Blocks, Floors, Units)
- Property > Tenant & Lease (Tenant, Clearance, New Lease, Renew/Terminate, Schedule)
- Property > Billing & Receipting (Invoices, Receipts, Ledger, Dashboard)
- Property > Maintenance (Requests, Assign, Dashboard, Work Completion)
- Property > Settings
- Property > Reports

Typical Workflows

1. Register a Property
 - Add Category & Type (once per organization)
 - Add Property (address, locality, metadata)
 - Upload Attachments (ownership docs, drawings)
2. Structure Mapping
 - Add Blocks → Floors → Units (with sizes and attributes)
3. Tenant Lifecycle
 - Add Tenant (KYC, contact, documents)
 - Create New Lease (unit, terms, start/end, rent schedule)
 - Renew or Terminate as needed
 - Maintain Lease Schedule (generate invoices per schedule)
4. Billing & Receipting
 - Create/Review Rent Invoices
 - Post Receipts; print receipt PDF
 - Use Tenant Ledger and Rent Dashboard for tracking
5. Maintenance Management
 - Log Maintenance Request
 - Assign to staff/contractors
 - Track Dashboard, confirm Work Completion

Tips

- Ensure payment frequency and schedule settings align with lease terms.
 - Use tenant statement PDF for audits and tenant communication.
-

4.6 Fleet Management

Overview

Vehicle registry and documents, driver management (permanent/contracted), assignments, trip logs, route planning, inspections, maintenance schedules, service alerts and rules, fuel logs, running costs, GPS/telematics, compliance/inspection schedule, settings (make/model), and reports.

Navigation

- Fleet > Vehicles, Documents, Assignments
- Fleet > Drivers & Contracted Drivers (licenses, assignments)
- Fleet > Trip Logs; Route Planner
- Fleet > Maintenance Schedule; Repair Logs
- Fleet > Service Alerts; Alert Rules
- Fleet > Fuel Logs; Fuel Types; Running Costs
- Fleet > Compliance > Inspection Schedule
- Fleet > Settings: Fleet Make/Model
- Fleet > Reports

Typical Workflows

1. Vehicle & Driver Setup
 - Add Vehicle, upload documents
 - Add Drivers and Contracted Drivers; track license validity
2. Trip Management
 - Create Trip Log (vehicle, driver, route, purpose)
 - Optionally use Route Planner for waypoints and optimization
3. Maintenance & Compliance
 - Create Maintenance Schedule; update status (done/cancel)
 - Record Repair Logs (normal/emergency)
 - Acknowledge Service Alerts; configure Alert Rules
 - Manage Inspection Schedule (type/date/compliance)
4. Costs & Fuel
 - Record Fuel Logs (date, quantity, price)
 - Record running costs (tyres, insurance, oil, etc.)

Tips

- Use “Available Vehicles/Drivers” helpers when assigning trips.
 - Ensure Make/Model master data is maintained for consistency.
-

4.7 Document Management (DMS)

Overview

Centralized repositories, files, tags and tagging rules, bulk upload, permissions at file and repository level, legal hold, search, and reports.

Navigation

- DMS > Repository (create, manage visibility/permissions, move)
- DMS > Files (upload, preview, check-out, download, tags)
- DMS > Search
- DMS > Bulk Upload
- DMS > Legal Hold
- DMS > Reports

Typical Workflows

1. Organize a Repository
 - Create repository; set visibility and permissions
 - Upload files; organize folders (if enabled)
2. Work with Files
 - Preview or embed preview
 - Check-out (lock), edit offline, check-in
 - Move files, manage tags and tagging rules
 - Download individual files or bulk via selections
3. Legal Hold
 - Place legal hold on a set of files during litigation/compliance events
 - Release hold when appropriate

Tips

- Use tags for quick retrieval and automated rule-based tagging.
- Activity views show file history for audit.

4.8 Legal

Overview

Manage legal documents, dispatches, execution logs; contracts; clauses; templates/drafts; disputes/cases with evidence, counsels, outcomes; obligations and assignments; legal searches; loan securities; intellectual property and tracking; comprehensive compliance suite (obligations, tasks, calendar, controls, incidents, filings, setup); and reports.

Navigation

- Legal > Documents (plus Dispatches & Execution Logs)
- Legal > Contracts (Maintenance)
- Legal > Clauses; Templates; Drafts
- Legal > Cases (with Evidence)
- Legal > Counsels; Outcomes
- Legal > Obligations (and Assignments)
- Legal > Search Requests (findings, approvals)
- Legal > Securities
- Legal > Intellectual Property; IP Tracking
- Legal > Compliance: Obligations, Tasks, Calendar, Controls, Incidents, Filings; Setup
- Legal > Reports

Typical Workflows

1. Contract Lifecycle
 - Create Contract and related documents
 - Add Clauses or Templates as building blocks

- Track Obligations from documents and assign to users
2. Disputes & Litigation
 - Open Case; upload Evidence; assign Counsels; update Outcomes
 3. Intellectual Property
 - Maintain IP registry; raise disputes when conflicts arise
 4. Compliance Management
 - Create Obligations (regulatory) & assign tasks
 - Maintain Calendar (filing dates, renewals) with alerts
 - Record Controls and their Evidence
 - Log Incidents and actions; view incident dashboards
 - Filings: maintain templates and submit/record filings

Tips

- Use assignments and activity logs for accountability and audit trails.
- Compliance setup pages maintain master lists (bodies, areas, types).

4.9 Insurance (Bancassurance)

Overview

Referral intake and assignment; customer onboarding and communications; policy proposals, underwriting feedback, issuance, renewals; premiums; claims assessment and closure with payments; commission rules/tiers and tracking; insurers/products/riders; pricing rules; lifecycle controls; settings; and reports.

Navigation

- Insurance > Bancassurance > Referrals (create, assign, performance)
- Insurance > Customers (profile & KYC, listing, communications)
- Insurance > Policies (create, review, submit underwriting, feedback, issuance, register, renewals)
- Underwriting (review/submit)
- Premiums (CRUD, print receipt)
- Claims (index, assess, close; payments list/initiate)
- Commissions (rules, tiers, earned, payouts)
- Insurers & Mapped Products; Products & Riders; Pricing rules
- Lifecycle; Settings; Reports

Typical Workflows

1. From Referral to Policy
 - Intake referral; assign to an officer
 - Create or link Customer profile (KYC)
 - Create Policy Proposal; submit for underwriting; capture feedback
 - Issue policy upon approval; add endorsements as needed
 - Manage renewals (upcoming renewals list)
2. Premiums & Receipts
 - Record premium payments and print receipts
3. Claims
 - List claims; open assessment; record findings

- Close claims when resolved; manage claim payments

4. Commissions

- Define Commission Rules and Tiers
- View earned commissions; post payouts and view history

Tips

- Pricing rules can be tied to products/providers for accurate premium calculation.
 - Use portfolio view under Customer to see holdings.
-

4.10 HRM (Human Resource Management)

Overview

Manage departments, employees, and internal committees.

Navigation

- HRM > Departments
- HRM > Employees
- HRM > Employee Internal Committees

Typical Workflows

1. Maintain Department Structure
 - Create/edit departments that other modules reference
 2. Manage Employees
 - Create employees; update data; manage status
 - Add/remove employees to internal committees
-

4.11 Finance

Overview

General Ledger; Accounts Payable/Receivable; Bank Management (banks, accounts, cashbook, transfers, transactions, cheques/chequebooks); tax configuration and reports; integrations (PO→Invoice; salary journal templates); petty cash; approvals/posting; analytics reports.

Navigation

- Finance > GL: Journal Entry/Batch; Recurrent/Reversing Journals; Ledger Reports; Trial Balance
- Finance > AP: Vendor Master; Invoice Entry; Payment Vouchers; Payment Processing; Aging
- Finance > AR: Customer Master; Invoice Generation; Receipts Posting; Credit Management; Aging; Statements
- Finance > Bank Management: Banks, Branches, Bank Accounts, Cashbook, Transfers, Transactions, Cheques/Books
- Finance > Tax: Jurisdictions, Types, Rules, Summary; e-Filing
- Finance > Integrations: PO→Invoice sync; Salary Journal Templates
- Finance > Petty Cash: Floats; Pettycash Vouchers (disbursement, replenishment, refund)
- Finance > Reports

Typical Workflows

1. GL Journals
 - Create manual Journal Entry; post upon approval

- Schedule Recurrent Journals; create Reversing Journals as needed

2. Payables (AP)

- Enter Supplier Invoices (link to PO/GRNs where applicable)
- Generate Payment Vouchers and process payments
- Manage Credit/Debit Notes and Approvals

3. Receivables (AR)

- Generate Customer Invoices
- Post Receipts; view Customer Statements

4. Bank Management

- Maintain banks/branches/accounts
- Cashbook: create payment/receipt, post/void
- Bank Transfers and Bank Transactions (post/void)
- Chequebooks: manage leaves; issue/receive; deposit/clear/bounce/cancel

5. Tax

- Setup jurisdictions/types/rules; view tax summary report

6. Petty Cash

- Setup floats; create vouchers; post/void; submit/approve/reject; wizard-assisted replenishment

Tips

- Use mapping previews for auto-GL postings
- Use drilldowns (e.g., AR aging) for analysis

4.12 Budget Line & Analytics

Overview

Budget setup and structure; GL mappings; activities; rates; budgeting workspace (periods, projections, entry by GL line); approvals; consolidation; top-down allocation; re-allocation tools; analytics dashboards; CBS data sync and logs; reports.

Navigation

- Budget > Budget Lines, GL Mapping, Activities Master, Rates
- Budget > Periods, Projections, Entry by GL Line
- Budget > Submit for Approval; Approvals
- Budget > Consolidation; Top-Down Allocation
- Budget & Analytics > Reallocation; Limits
- Budget > Analytics Dashboards & Data Exports
- Budget > Admin & Integration: CBS Sync, Data Sync Logs
- Budget > Reports

Typical Workflows

1. Setup

- Define Budget Lines & map to GL
- Create Activities Master; set Rates

2. Budgeting Workspace

- Create Budget Period; define scenarios
- Enter Projections (form-based or import where enabled)

- Post GL line entries for granular control
3. Approvals and Consolidation
- Submit for Approval; approvers review and decide
 - Consolidate approved budgets; perform top-down allocation if required
4. Reallocation & Limits
- Use Reallocation tool to move budget between lines within rules
 - Define Ledger Limits to control spending authority
5. Analytics
- Use dashboards for trends, performance, risk indicators
 - Export analytics data if available

Tips

- Ensure GL mapping is complete before entering projections
 - Use department/branch filters in dashboards
-

4.13 Settings

Overview

User and access management, branches, code lists, integrations, teams, meeting rooms.

Navigation

- Settings > Users, Roles, Branches
- Settings > Lists (Code Lists & Orders), Localities, Currencies
- Settings > Integrations (system-level)
- Settings > Teams & Team Users
- Settings > Meeting Rooms

Typical Tasks

- Create Users; assign Roles; manage branch roles
 - Maintain code lists and locality data for lookup fields
 - Configure system integrations (where supported)
 - Manage Teams and bulk notifications
-

4.14 My Account

Overview

Personal workspace including schedule and tickets.

Navigation

- My Account > Schedule (meetings/calls)
- My Account > Tickets
- Global: Help

Typical Tasks

- Review upcoming activities
 - Check and update tickets assigned to you
 - Access help pages
-

5. Troubleshooting & FAQs

- I cannot see a module or menu: Check with admin if your role grants access.
- I cannot edit or submit: The record might be in a locked/approved state; check status or permissions.
- File upload fails: Check file size/type; try again or contact support.
- Approval not visible: Ensure the item was submitted and you are an approver.

6. Glossary

- RFQ: Request for Quotation
- GRN: Goods Receipt Note
- COA: Chart of Accounts
- UOM: Unit of Measure
- DMS: Document Management System

7. Change Log

- 1.0: Initial comprehensive user manual covering all modules.
